

BAOJUN (GERALD) YANG

gerald6331@gmail.com | 289-668-6331 | Niagara-on-the-Lake, ON | github.com/GeraldYa

AI-native builder with 10+ years of professional experience in technology -- from hands-on hardware support to independently shipping full-stack applications, multi-agent AI systems, and production infrastructure. Self-taught developer who leverages AI tools to design, build, and deploy real products at startup speed: 7+ web services in production, a 5-agent autonomous bot platform, and a crypto trading system processing live market data. Combines strong technical execution with deep retail operations experience. Bilingual in English and Mandarin Chinese.

TECHNICAL PROJECTS

Multi-Agent AI Platform

Claude Code / Telegram API / Docker / Linux

- Architected a system of 5 specialized AI agents with autonomous task execution, persistent memory, and dedicated Telegram interfaces -- handling market analytics, media management, and creative writing.
- Built the full deployment pipeline: Docker containerization, tmux session management, automated startup scripts, and health monitoring for continuous operation.

Polymarket Trading Dashboard

Node.js / Express / ethers.js / CLOB API / Android

- Developed a real-time prediction market analytics platform with multi-account portfolio tracking, automated trade execution, and smart-money signal detection.
- Engineered a companion auto-follow system with configurable risk rules and real-time Telegram alerts. Shipped web dashboard and native Android app.

Toolbox Web Portal & Additional Projects

Node.js / Python / Gemini API / ESP-IDF / LVGL

- Built a unified gateway consolidating 7+ services into a single interface with health monitoring and document preview.
- Created an AI content processing platform ("Thought Evolution") with multi-model rewriting and user-tiered access.
- Developed an ESP32-S3 IoT dashboard with custom LVGL UI, Chinese font rendering, and real-time data feeds.
- Automated media library management with multi-source cross-referencing (TMDB / Douban / IMDb) and NAS integration.

INFRASTRUCTURE & DEVOPS

- Manage a production Linux server (Ubuntu 24.04) running 7+ concurrent services via systemd with automated monitoring.
- Configure Cloudflare Tunnel for secure external access, multi-machine SSH mesh, and Git-based version control.
- Handle full lifecycle: development, testing, deployment, monitoring, and incident response -- all as a solo operator.

PROFESSIONAL EXPERIENCE

Geek Squad Field Agent

Best Buy Canada -- St. Catharines / Niagara Region, ON | Oct 2022 - Present

- Self-directed field technician across multiple locations -- multi-platform diagnostics (Windows, macOS, iOS, Android), MDM deployment (Intune/SCCM), and PowerShell automation.
- Train and mentor junior technicians on hardware diagnostics and customer engagement.

Store Manager > Technician

DF Computer (Apple Authorized Reseller) -- St. Catharines, ON | Jul 2015 - Feb 2022

- Grew annual revenue by 100%+ within 12 months through data-driven operations and consultative selling.
- Managed full P&L, vendor relationships (Apple), team coaching (5+ associates). Apple ATLAS certified.

TECHNICAL SKILLS

AI & LLM	Claude API/Code, Gemini API, multi-agent orchestration, prompt engineering, AI-assisted development.
Backend	Node.js/Express, Python, REST API design, ethers.js (Web3/Ethereum), SQLite.
Frontend	HTML/CSS/JS, responsive dashboards, Android app development.
Embedded	ESP-IDF, LVGL, C (ESP32-S3).
DevOps	Linux administration, Docker, systemd, Cloudflare Tunnel, Git/GitHub, SSH.
IT Systems	Microsoft 365, Active Directory, Intune/SCCM, PowerShell, network diagnostics.
Languages	English (Professional) / Mandarin Chinese (Native).

EDUCATION & CERTIFICATIONS

- Bachelor of Arts in Economics -- Brock University, St. Catharines, ON (2016).
- CompTIA A+ Certified (2023) / Apple ATLAS Certified (Sales & Service).
- Valid Ontario Class G Driver's License.
