

BAOJUN (GERALD) YANG

AI-Native Builder & Communicator

gerald6331@gmail.com | 289-668-6331 | Niagara-on-the-Lake, ON | geraldya.github.io | linkedin.com/in/gerald-yang-ai

SUMMARY

Builder and communicator with 11 years in North American technology and retail. I build AI systems that run every day — a multi-agent AI platform running 24/7 since March 2026 — and I explain AI so people can actually use it: 70 free Chinese guides on niuxue.org and a published book on AI economics. At Best Buy I designed a quote system that was adopted department-wide and rolled out to 200+ Geek Squad field agents. Bilingual in English and Mandarin Chinese.

AI PROJECTS

Multi-Agent AI Platform — self-hosted

Mar 2026 – Present

[Claude Code](#) · [MCP](#) · [Skills & Plugins](#) · [Docker](#) · [Cloudflare Tunnel](#)

- Built and operate specialized AI agents with persistent memory, subagent dispatch, scheduled self-checks, and remote access through Claude Remote Control; running 24/7 since March 2026.
- Developed custom MCP servers, Claude Skills, and Plugins for orchestration; the same self-hosted NAS runs 10+ production web services.
- Daily automated health patrols and structured handoff notes keep work from getting lost across restarts.

niuxue.org — free Chinese AI learning site

May 2026 – Present

[Astro Starlight](#) · [Cloudflare Pages](#) · [AI editorial pipeline](#)

- Built and maintain 70 guides that take beginners from their first AI chat and Chinese AI assistants to Claude Code, agents, and real case studies.
- Ran a September 2026 full-site audit with 37 AI agents that flagged 529 issues; high-risk findings were verified independently before fixing.
- Every fix goes through independent review: a separate agent re-checks each change and verifies key facts against official sources.

Mold — AI-native web protocol ([moldpage.dev](#))

Apr 2026

- Designed a 14-endpoint, API-first protocol that lets any LLM edit web pages through JSON instead of raw HTML: 97% fewer tokens per edit (3,500 → ~100), a 100% first-attempt pass rate across 5 models, and 13 differentiated AI-crawler strategies.

Tokenomic: REPRICED by AI — author (Amazon, ISBN 979-8247392057)

Feb 2026

- Book on how AI reprices intelligence and labor; introduced the “Three Waves” framework (Digitization → Vectorization → API-ization) that later shaped the Mold protocol.

PROFESSIONAL EXPERIENCE

Geek Squad Field Agent — Best Buy Canada

Oct 2022 – Present

[St. Catharines](#) / [Niagara Region, ON](#)

- Designed and led ServiceQuote, a quote and dispatch tool officially adopted at the department level and rolled out to 200+ field agents; after the first version, the company's technology team took it over.
- Store customer satisfaction of 85%+ against a company average of 78%; resolved 100+ escalated customer complaints.
- Multi-platform diagnostics (Windows, macOS, iOS, Android), MDM deployment (Intune/SCCM), and PowerShell automation; B2B clients include schools, churches, and a Royal Canadian Legion branch.
- Train and mentor junior technicians on diagnostics and customer engagement.

Store Manager, previously Sales Associate / Technician — DF Computer (Apple Authorized Reseller) Jul 2015 – Feb 2022

St. Catharines, ON · Store Manager Sep 2018 – Feb 2022

- Grew annual store revenue 100%+ within 12 months; owned the full P&L, the Apple vendor relationship, and coaching for 5+ associates. Apple ATLAS certified.
- Niagara's largest independent electronics retailer (4 stores at peak) and ZTE's designated North American repair and complaint center.
- As a sales associate: 45% close rate, with repeat clients generating 60% of revenue.

SKILLS

AI & LLM	Claude Code (deep), MCP servers, Claude Skills & Plugins, multi-agent orchestration, prompt engineering, Claude API, GPT-5 / Codex, Gemini, DeepSeek
Communication	Technical writing for non-technical readers in English and Chinese, AI education content, customer training and workshops
Web & Backend	Node.js / Express, Python, REST and JSON Schema API design, SQLite, HTML / CSS / JS, Astro
DevOps	Linux, Docker, systemd, Cloudflare Tunnel & Pages, Git / GitHub, SSH / tmux
IT Systems	Microsoft 365, Active Directory, Intune / SCCM, PowerShell, network diagnostics
Maker	3D printing (Bambu X1C), CAD (Shapr3D); original designs with 800+ downloads on MakerWorld
Languages	English (professional), Mandarin Chinese (native)

EDUCATION & CERTIFICATIONS

- Bachelor of Arts in Economics — Brock University, St. Catharines, ON (2016)
- CompTIA A+ (2023) · Apple ATLAS (Sales & Service) · Ontario Class G driver's licence
